PATCHWORK & QUILTING

WORKSHOPS BROCHURE

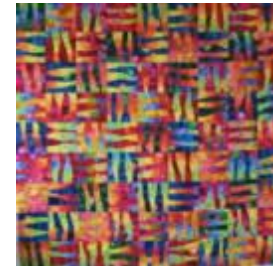

This portfolio of project-based and technique-driven patchwork and quilting classes is available for teaching at shops, retreats or private venues on the Central Coast, in the greater Sydney metropolitan area and beyond. I am happy to travel!

The workshops are suitable for all levels and are generally structured as 1-day (six hour) classes. Those marked * can be extended to 2-day classes.

Power Stripping

Learn the secrets of "power stripping"! Striking designs that grow quickly with minimum fuss and maximum fabric economy. Choose from over 12 designs or make up your own using colour and design principles shared in this workshop. Jelly rolls welcome!

Making Waves

Learn how to make this striking design. There are no templates and no pins. It's quick, it's easy and it's fun! Once mastered, this technique will be useful in a range of improvisational projects including wavy variations of traditional blocks.

Serendipity Circles*

Is it time to let loose?! This workshop explores stress-free methods of fusing and piecing your very own circles of serendipity. For a final flourish, the class also covers decorative embellishment techniques including an optional "Quilt-As-You-Go" component.

Colour Rhapsody*

An adventure with fabric stacks, freeform cutting and pinless curved piecing.

This workshop includes an introduction to the effective use of colour in quilts and tips for free-motion machine quilting.

Scrap Queen Odyssey*

Join me in an adventurous journey designed to realise the potential of your quilting scrap bag no matter what shape or size your scraps are. This workshop explores a variety of quiltmaking techniques including foundation piecing, fusible web appliqué, crazy patchwork, half square triangles and improvisational piecing.

Strata Various*

Make beautiful music in fabric and colour. First create your unique strata in your favourite colours. Then mix it up with cutting, slashing, insertions and other deconstruction and improvisational techniques.

Bound to Please

Improve your quilts instantly! This workshop covers a range of quilt finishing techniques from the classic continuous binding (without bulges!) to the ever useful escape hatch; the artful facing finish to informal satin stitch edging & more.

Sweet Bagatelle

This quilted tote bag is a great way to showcase your "can't bear to cut it up" favourite fabric and experiment with decorative stitches on your sewing machine. Optional embellishments include prairie points and adding a name. Small or large size. This is a **half-day** workshop.

Stacks of Improvisation*

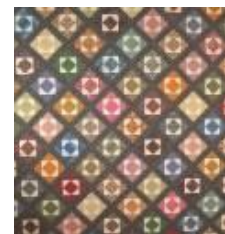

Improvise with fabric stacks, freehand cutting and pinless curved piecing. Imagine the possibilities! These colour and design exercises will set you on the path of creative self-expression in contemporary quilting and can be translated to larger works.

Squared Fun: Fun Squared

Learn how to accurately calculate and machine piece the "Double Square" & "Square in Square" blocks to make your preferred block size.

We then consider a range of setting options for this very versatile block!

A Place at Your Table

Table mats/place mats and runners make great gifts and can often be made out of fabrics straight from your stash.

Simple, striking designs using machine appliqué or you can make up your own unique design.
